

Where does collaboration stop?

Simon Willmoth, University of the Arts London

Duration of video clip: 1 minute and 14 seconds

In terms of the family's collaboration: clearly that was set up, it was quite carefully orchestrated but my question - is where does that stop? Does it stop with the end of the of the film does it stop with the film going out in the name of the director, the sound person, you know, the producer, the filmmaker, the photographer, the artist, and if it's a true collaboration then the family should be co-authors with it, so I think the point about collaboration being a term that's overused, is well made. There's different kinds of collaboration artistically, you know, and but that usually involves co-authorship. This kind of collaboration doesn't involve co-authorship so it is more around participation.
