

## **Has ethical responsibility changed the way you work?**

**Joanna Wright, Bangor University**

Duration of video clip: 45 seconds

Yeah thinking about ethics has definitely changed the kind of work that I make. So I'm working in a way now where I allow people to - or I don't allow - people keep the rights in their own stories and interviews, so that obviously that can make some problems in funding but it's a way that I feel more comfortable. Within a project I'm specifically working in at the moment, I work in a very small community but everybody knows each other, and so there's, there's tensions there, and it feels like when this work is published, as a whole thing, I want people to be able to say yes, you can include or not include, that because it is going to have ongoing impact in their life.
